Fire Alarms / Testing / Drills

Fire Alarms

If the fire alarm sounds, you must evacuate the building immediately and make your way safely to your **nearest designated assembly point**. Please do not stop to collect personal belongings.

Weekly Fire Alarm Testing

Fire alarm testing takes place **every Wednesday** and is carried out by the Deputy Lodge Managers. During the weekly test, the alarm will sound for approximately **10 seconds**. **You do not need to evacuate during this short test.**
However, **if the alarm continues to sound for longer than the usual 10-second test, you must treat it as a genuine alarm and evacuate immediately.**

Termly Fire Drills

Fire drills are carried out at **all of our properties once each term**. These drills take place **early in the morning** and require the **entire household to evacuate**.

Everyone must leave the building and reach the designated assembly point **within 3 minutes**. If the building is not fully evacuated within this time, **a further fire drill will be carried out on another day**.

Fire alarms and drills are essential for everyone's safety. Please take every alarm seriously and evacuate promptly when required.

Fire safety video

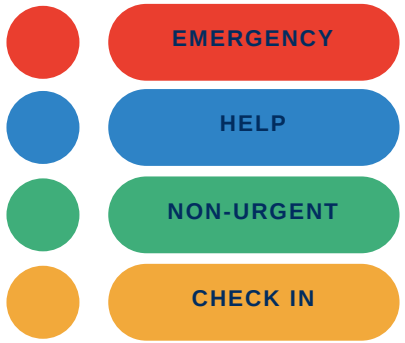

The updated college fire safety video is available by following this link https://youtu.be/24ufYui3c5M. The Porters' fire briefing is available at https://youtu.be/WKAAYSV3XpY

SafeZone App

- SafeZone gives Oxford students a simple way to get help, check in, and receive important safety alerts.
- **Why students use SafeZone?**
  - **Get help fast:** Raise an Emergency, Help, or Non-urgent alert with a tap. Your location is shared with responders while the request is open.
  - **Know about major incidents:** Registered users can receive college and University threat-to-life alerts directly through the app.
  - **Check in with confidence:** Share your location during a check-in, or set a timer that can raise an alert if you do not check out.
- **SafeZone is free and opt-in. It adds college and University support — it does not replace 999.**

SafeZone App

The app is designed around simple, recognisable actions.

Threat to life or urgent danger — sends your location to responders straight away.

General assistance when you would like someone to help.

A safety concern that is not an emergency, but you would still like someone to know.

Share your current location, or set a timer so an alert can be raised if you do not check out.

Get set up in a couple of minutes: Download once, sign in with Oxford, and allow the location and notification permissions SafeZone needs.

Your location is not being tracked day to day: Location starts sharing when you raise an alert or check in, and stops when the response is complete. College First Responders or OUSS can see your location while they are handling the request. SafeZone is GDPR compliant and uses advanced encryption.
